DETAILED ACTION

Response to Amendment

Applicant's arguments filed 05/19/08 have been fully considered but they are not persuasive. The response submitted by Applicant does not overcome the rejection made by Examiner in the last Office action.

Based on Applicant's arguments, the 103 rejection based on Patton et al is replaced by 102/103 using the same reference, as stated below:

Claims 13-24 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Patton et al (3,321,533).

Patton reference discloses a catalyst composition for producing a polyethylene oxide polymer (see col. 4, line 51) wherein the catalyst composition comprises A component which is an organoaluminum compound such as aluminum alkyl and component B which is the base alkali metal hydroxide (see col. 1, lines 52-58; claims).

The disclosure of the reference differs from the instant claims in that it does not disclose the claimed MW.

However, the reference does disclose the required reactants for the claimed catalyst composition. In view of this similarity, it would appear to be inherent that the product, a catalyst composition having the claimed MW must be considered inherent in the prior art. See *In re Best*, 195 USPQ 430, 433 (CCPA 1977).

Nota that Applicant's arguments are based on the type of reaction product to form the catalyst composition. Said arguments have been fully considered but they are not persuasive since they are not commensurate in scope with the claims.

Note that claim 13 discloses “---wherein the catalyst composition comprises component A---and component B---“ in that the use of the term “ comprises” in this particular case means the presence of A component and B component but does not require any type of reaction between two components, as in Applicant's arguments.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
